

JUNGLE COLOR CHALLENGE

Colorful animals are beautiful to look at, but their colors are not just for our enjoyment. They may use their colors to help them attract a mate, warn other animals, defend their territory or identify others of their own kind.

YOUR CHALLENGE IS TO FIND ANIMALS THAT HAVE YOUR TEAM COLORS –

Good Luck!

Our team colors are _____ and _____ .

When you see an animal that has one of your team's colors, your team scores one point.

When you see an animal that has many colors, including both of your team's colors, you score two points.

If you see an animal that has only your team's two colors, you score three points.

And when you find an animal that has one or both of your team's colors in it's name, you score five points. Write the animal's name on the back of this page.

*If you see a picture of an animal with your team's colors (in any of the categories above), but you do not see the actual animal, you only score ½ point.

Make a hatch mark in the appropriate column for each animal you see.

one color = 1 point	many colors with both yours = 2 points	only your two colors = 3 points	color in name = 5 points Write the name on back	on sign = ½ point
